PROFESSIONAL SUMMARY

Software Engineer with 7 years of experience developing high-performance web and mobile applications using Node.js, React.js, and TypeScript. Proven track record of reducing response time by 35% through optimization of RESTful APIs, PostgreSQL queries, and microservices architecture. Strong experience with AWS cloud services (EC2, S3, Lambda, Glue), Docker, and Kubernetes, with a focus on scalability, code quality, and continuous delivery. Results-driven professional, collaborative in Agile environments, and committed to engineering best practices.

CORE SKILLS

- **Frontend:** React.js, React Native, Next.js, HTML5, CSS3, CSS Modules, Tailwind CSS, Styled Components, JavaScript (ES6+), TypeScript, Bootstrap, jQuery, React Router, React Hook Form, Zod, Expo
- **Backend:** Node.js, Express, Fastify, Nest.js, ASP.NET Core, C#, Java, GraphQL, REST APIs, Axios
- **Databases:** PostgreSQL, MongoDB, SQL Server, MySQL, CosmosDB, Redis, NoSQL, Prisma ORM
- **Cloud & DevOps:** AWS (EC2, S3, Glue, Lambda, Athena, Secrets Manager), Azure, Docker, Kubernetes, Microservices, CI/CD, GitHub Actions
- **Testing:** Automated Testing, Unit Testing (Jest, Vitest, Mocha/Chai), Integration Tests, TDD
- **Performance:** Lighthouse, browser dev tools
- **Data & Analytics:** Python, PySpark, HiveSQL, DataBricks, FICO DMPS
- **Tools:** Git, GitHub, Bitbucket, Jira, Vite, Visual Studio Code, Visual Studio
- **Methodologies:** Scrum, Agile

PROFESSIONAL EXPERIENCE

Senior Technical Consultant (Senior Data Engineer) — **BRQ Digital Solutions** | Nov 2025 – Present | Remote

I designed and optimized cloud-based data platforms for financial services, increasing efficiency by 30% and ensuring data integrity in critical decision-making systems.

- Design and optimize scalable data pipelines and serverless workflows using AWS services (Glue, Lambda, Athena, S3, Secrets Manager).
- Leverage FICO DMPS to build and enhance credit decisioning systems for major financial institutions.
- Collaborate cross-functionally to ensure data integrity, performance, and compliance in production environments.

Full-Stack Developer — **Mobicity** | Apr 2022 – Nov 2025 | São Paulo, SP, Brazil

I developed and maintained web and mobile applications using Node.js and React.js, implementing RESTful APIs that improved performance by 35% and ensured scalability using AWS services (EC2, S3).

- Designed and developed scalable applications using Node.js, React.js, Mongoose, and AWS services (EC2, S3).
- Implemented RESTful APIs and method queuing for improved system performance and reliability.
- I optimized database queries in MongoDB, reducing response time by 35% and improving overall system efficiency.
- Collaborated with cross-functional teams in an Agile environment to deliver features ahead of deadlines.

Technology Consultant — **Management Solutions** | Apr 2021 – Apr 2022 | São Paulo, SP, Brazil

- I led the configuration and validation of decision engine policies, increasing accuracy by 20% through optimized automation scripts.
- Utilized JavaScript, Python, PySpark, HiveSQL, DMPS (FICO Tool), CosmosDB, and DataBricks (Azure) to process large datasets.

- Enhanced data validation accuracy by 20% through optimized automation scripts.

Founder & Digital Marketing Specialist — Self-Employed | Oct 2020 – Mar 2021 | São Paulo, SP, Brazil

- Founded and managed a digital marketing agency serving local businesses and e-commerce.
- Designed and executed targeted campaigns on Google Ads and social media, achieving up to 200% ROI for clients.

Technical Support Intern / Junior Developer — Permute Franchising LTDA | Apr 2019 – Sep 2020 | São Paulo, SP, Brazil

- Developed and maintained internal systems using ASP.NET Core, JavaScript, jQuery, and Bootstrap.
- Provided technical support and improved workflow efficiency by automating Excel reports.

EDUCATION

B.Sc. in Computer Science | Universidade São Judas Tadeu | 2018 – 2021

Web Development with ASP.NET & Visual Studio | Impacta Tecnologia | 2019

Node.js, React.js & React Native Bootcamp | Rocketseat | 2022

CERTIFICATIONS

Node.js Foundations | Rocketseat | 2024

Certification in Node.js fundamentals, covering REST APIs, streams, middlewares and backend development with JavaScript.

React Foundations | Rocketseat | 2026

Certification in React fundamentals, covering components, hooks, state, props and development of modern and reactive interfaces.

React Native Foundations | Rocketseat | 2025

Certification in React Native fundamentals, focused on cross-platform mobile development, native components and styling.

Interfaces, Navigation and Local Storage | Rocketseat | 2025

Certification focused on React Native, exploring mobile interface creation, screen navigation and local data persistence.

Scalable Microservices | Rocketseat | 2025

Certification in microservices architecture, covering design patterns, service communication, scalability and best practices.
